Application Developer

Foster + Partners | London, UK | Jan 2019 - Dec 2019

I helped the company to build, test and deliver their **Intranet** system and all the **accompanying application** inside it. They used a lot of my ideas and some of the contacts from my previous positions. I have been an important part of the agile meetings. Many of the 2000+ employees received my help with **handling tickets** on their and my machines.

Senior .NET Developer

BGO Software | Plovdiv, Bulgaria | Jun 2016 - Nov 2018

Here I played a key role as the developer with more experience on the team, by coordinating the work with the Project Manager and **training a junior** for just a few months. Together we managed to **maintain and improve** a system of the **NHS**, used for the health researches of the scientists. We were in an everyday communication with the Government team and succeed to make the system stable. My main responsibilities were to develop **new features and handle tickets**.

.NET Developer

Comstream | Jun 2015 - Jun 2016

One of the **big Energy Saving** companies who is located in Sweden requested the help me and a junior dev to build their **mobile Installer** for a **smart home** gadget. I managed to coordinate the work between us, to develop, test and deliver the application. I've been in an everyday communication with their project manager and included in the scrum meetings.

.NET Developer

BuCons | Jan 2013 - Jun 2015

My first position used to be the most difficult as I had to entirely develop **web shops** and work with a Swiss Dev team on a **new module** in a Desktop Application for the **HSO Business University**. Through the time I found and **trained a Junior Developer** who helped me. The project manager requested a lot of small applications like Win services, Web services and libraries. All of them was delivered on time.
